

CENTRAL OPERATIONAL REPORTING

What it is

viewNG is a reporting tool that delivers various operational reports (pickup, real data vs forecasted data etc.) based on daily PMS operational data.

What does it do and how

- Collect production and on the books data from PMS's via interface
- Accurate up-to-date operational information on a daily basis
- Manager reports, monthly summary and YTD overview at a glance
- Easy forecasting of revenue and costs of expenses, including automation using trigger parameters
- Reports on forecasts versus budget for up to 12 future months
- Pickup reporting (up to 2 years past data)
- Breakdown of revenue and number of guests per postal code
- Segment reporting either consolidated to major segments or viewed on a detail level
- Event analysis including multi-year comparison of event effects
- Hotel group data consolidation by various groupings of hotels (i.e. MICE, Spa, City)

Your benefits

- Better informed decisions;
- More transparent performance information at your fingertips;
- Easier keeping costs and expenses in line with revenue;
- Cost savings through elimination of manual data entry;
- Automated grouping of hotels by brand or group.

What you need to use it

- PC and an internet connection
- Sign up for viewNG
